-12-

REMARKS

Applicants amended claims 1, 15, and 29 to change "remote server" to "server", because the antecedent basis for this element is the "at least one server"; there is no separate "remote server" element from the "server" in these claims. For instance, claims 1, 15, and 29 recite that the "user interface output is controlled by the at least one remote server through the standard APIs sent by the at least one server over the network". Thus, the "server" that sends the APIs is the server that is controlling the user interface output. For this reason, the "remote server" is the "server."

Applicants further amended claim 6 to correct a minor formatting error.

Applicants request the Examiner to enter these amendments as they do not alter the scope of the claims and just clarify antecedent basis.

Applicants submit that no new claims or new matter has been added to the application. Nonetheless, should any additional fees be required, please charge Deposit Account No. 09-0460.

The attorney of record invites the Examiner to contact him at (310) 553-7977 if the Examiner believes such contact would advance the prosecution of the case.
